PABLO VINÍCIUS G. RAMOS

SYSTEMS DEVELOPER/ANALYST

I'm a web developer with a degree in Computer Science and work as a Freelancer. I have experience in Full Stack programming with Spring, Angular, PHP, Wordpress and Low Code tools.

EXPERIENCES

I currently work as a freelancer on dedicated platforms using various languages and for the company Net Sites using Wordpress to create dynamic, responsive pages and customized artwork for the client.

I've worked on Low Code development for the VLN Group using the following technologies: Power Apps, Power Automate and SQL Server in programming web and mobile applications for the company Corteva.

I was an IT support trainee at ESMAT (Escola Superior de Magistratura), helping with the use of digital learning platforms, feeding them with different content and keeping the devices in good working order.

PROJECTS

Website for local businesses *(Project link)*
Website made in Wordpress for the Palmas Impressoras store with banner art and selection of images for the site.

Facial recognition *(Project link)*
Face detection system with Python and OpenCV in which images of the face are captured, the algorithm is trained and recognizes the face through the webcam showing a degree of reliability.

CRUD with Spring *(Project link)*
I created a CRUD with the Spring Framework using the STS IDE to create and manipulate a RESTfull API using Postman connected to MySQL.
